- **Cropland Harvested** – This land represents the highest use of land in the agricultural enterprise. All land from which a crop was harvested or hay was cut, in the current year falls into this category. This includes the land in orchards, vineyards, nurseries, other perennial plantings and greenhouses.
- **Nonproductive Land** – The land on the farm which is nonproductive primarily due to slope, drainage capacity, soil type or topography
- **Cropland Pastured & Other Cropland** – Cropland used for pasture or grazing or land considered as tillable but is elected to be fallow or in cover crops. It can and often is used to produce crops, but its maximum income may not be realized in a particular year. This category also includes land planted in crops, which were to be harvested after the census year.
- **Permanent Pasture** – This land is typically not tillable, best suited for grazing or possibly part of an erosion control program. This category also includes necessary and related lands.
- **Productive Forestland**-This category replaces the prior Chapter 61 forest land.
